

## Build your own Course

To provide courses to suit you we are offering "Build your own course"

How this works:-

You

- Decide on the subject of the course  
There is a list of courses on the education page of the website to choose from, or provide your own subject
- Select a date and time to suit yourself  
Best to suggest several alternatives e.g. Saturday mornings, Thursday afternoons
- Send the details to the education committee

We will

- Select the most appropriate course from our list or produce a new one to suit your needs
- Contact you to discuss details
- Advertise the course to others
- Run the course

To get the best out of a course where students are spread over the Association it is likely that theory sessions will be held virtually and practical sessions will be held in Branches local to the students.
